PROFESSIONAL SUMMARY

ML/AI Engineer with 6+ years across data engineering and applied machine learning for National Bank of Canada, Isuzu Motors, AIS, and SystemWeb Technologies. MSc from National Tsing Hua University (thesis on Inverse Reinforcement Learning with Double Critic and Monte Carlo Tree Search); BSc in Actuarial Science. Production experience in C#, Python, and JavaScript. Currently building LLM multi-agent systems and moving toward inference-layer engineering with CUDA, NVIDIA NIM, NeMo, and TensorRT-LLM.

WORK EXPERIENCE

Oct 2023 –
Present

Software Developer

SystemWeb Technologies | Taipei, Taiwan

- Architected and published 3 plugins to an internal Claude Code plugin marketplace covering task execution, ideation, and AI-native SDLC onboarding for engineers new to AI-assisted workflows; cut per-feature development time from days to hours, with 3–4 in regular daily use across the internal engineering team.
- Designed a graph-based persistent memory layer for the agent system, replacing ad hoc context handling; indexes 500 documents to give agents queryable long-term recall across sessions.

Feb 2020 –
Jun 2020

Data Analyst

Tri Petch IT Solutions | Bangkok, Thailand

- Designed machine learning predictive models for Isuzu Motors campaigns; managed databases and cloud services.

Oct 2019 –
Dec 2019

Data Engineer (Contract)

Pruksa Real Estate | Bangkok, Thailand

- Architected data workflows and migrated on-premises data to AWS; supported the DataOps team for the real estate sector.

Jul 2019 –
Sep 2019

Data Analyst (Contract)

Advanced Info Service (AIS) | Bangkok, Thailand

- Analyzed regional data business requirements for Thailand's largest mobile operator (40M+ customers).

Mar 2018 – May 2019	Hadoop Developer ATA IT Limited Bangkok, Thailand Built ETL pipelines and integrated semi-structured data on the Hadoop platform for National Bank of Canada.
Jan 2018 – Feb 2018	Junior Data Scientist GameSpace Bangkok, Thailand Analyzed data and managed databases for a retail client with 10+ branches.
Sep 2017 – Nov 2017	Data Analyst Betimes Solution Bangkok, Thailand Built ETL, interactive dashboards, and mathematical prediction models for government-sector clients.

EDUCATION

Jul 2024	Master of Science (MSc), Information Systems and Applications National Tsing Hua University Hsinchu, Taiwan Relevant coursework: Reinforcement Learning, Cryptography, Neural Networks. Thesis: Enhancing Autonomous Driving Using Double Critic and MCTS for Inverse Reinforcement Learning.
Feb 2017	Bachelor of Science (BSc), Actuarial Science Mahidol University Bangkok, Thailand Mathematics, Statistics, Finance, and Economics.

TECHNICAL SKILLS

Programming: Python, C, C++, C#, SQL, R, JavaScript
AI / ML: Machine Learning, Reinforcement Learning, LLM Multi-Agent Systems, Claude Code
Data & Cloud: Apache Spark, Hadoop, ETL, AWS, Google Cloud Platform (GCP), Docker
Analytics: Tableau, Data Visualization

LANGUAGES

Thai: Native
English: Professional (IELTS 6.0, TOEIC 930)
Mandarin Chinese: Basic
